Answers Letters
Editor, The News

The Letter to the Editor written by Marius Hansen, president of the United Nations Association of Broward County cannot go unanswered.

We would like to ask Mr. Hansen, just where does he base his facts? If it is from the records of the United Nations Associations of Broward County that answers the question, it doesn't answer the truth.

Too many times in the past 10 years the people of this county have heard some of the speakers from the United Nations Association of Broward County, and to our shocking surprise one of their supposed, to be well known speakers berated the U. S. government, praising Russia and ended up saying the "U. S. needed the beating of her life." We all walked out after taking the notes. The United Nations Association of Broward County has nothing to do whatsoever with the UN.

Everyone knows all over the U. S. about the Red espionage leaking into the CIA and the UN secretariat. The Soviet bloc wall waffe of Bang Jensen's knowledge and "used the word misconduct" as the excuse for demanding his removal. The whole story was opened again last week in Miami Beach and the senator who was interviewed took suddenly ill, because he too, is investigating the truth.

If you want the real story, read the American Mercury of March 1960. The truth does hurt doesn't it? You will get the real truth in the American Mercury and when you read it you will then realize that the facts are distorted by certain people who want to brainwash the American people.

The answer to every paragraph of Mr. Hansen's letter will be answered in the American Mercury and I'll take the word of the American Mercury any day to someone who joins hands with the United Nations Association of Broward County.
